The convicts do not know yet that t "Kid" was a college professor interested in social research and prison betterment. The guards, who received the professor as a regular convict, were to their great surprise introduced to him before he left the institution.

Prof. MacCormick is preparing a re-port of his experience. He has criticised the sanitary conditions of the prison, but if he puts in all the convicts, "tips" he received, his report will make more interesting reading than even the famous Sing Sing book of Warden Thomas Mott Osborne. In general the professor praises the warden's handling of the men In furtherance of his movement for prison betterment, it was necessary for the professor to live as a prisoner and to be known to the guards and prisoners as such. For three days the professor labored in the yard and in the broom factory, observing prison work, the guards, sanitary arrangements, the food and other conditions. He was in prison nearly a week. The prison fare did not please him, and the sanitary condition he regarded as disgraceful.
